

# Acknowledgement

I wish to express our sincere gratitude to our External guide **Ronak Gandhi** and our mentor **Bansi Bhimani, Janki Vaishnani** for continuously guiding me at the company and answering all my doubts with patience. I would also like to thank my Internal Guide **Prof. T. M. Kodinariya** for helping us through our internship by giving us the necessary suggestions and advice along with their valuable coordination in completing this internship.

I also thank our parents, friends and all the members of the family for their precious support and encouragement which they had provided in completion of our work. In addition to that, I would also like to mention the company personnel who gave us the permission to use and experience the valuable resources required for the internship.

Thus, In conclusion to the above said, we once again thank the staff members of **RKIT Software Pvt. Ltd.** for their valuable support in completion of the project.

# Abstract

This report contains training modules from my internship at **RKIT Software Pvt. Ltd.**, which I completed as part of my B.E. from Gujarat Technical University and Government Engineering College, Rajkot. I received training in the field of Full Stack Developer of the company. I learnt how the .Net Framework is used in many of the world's application, Build Web Api's Using .Net Framework in C# With the database. I also improved my skills in C#, MySQL, and some advanced Backend and Frontend concepts.

During our training period we were given some modules for self training, Then for our core topics we were given training by a mentor. We were expected to gain deep knowledge of these topics and to prepare demos for the topics. After all this preparation is done we were reconciled for the corresponding topics in our next meeting. This was the flow of our training which ensured that we gained knowledge of our topics in depth and ensured the same to our mentors.

All of the learnings from the internship, as well as our project in WEB API format, as well as demos of separate topics, which is widely used in our company, are important aspects of this report.
